

APPENDIX F

UNIFORM STANDARDS FOR MONUMENTATION, CERTIFICATES OF SURVEY, AND FINAL SUBDIVISION PLATS

Effective February 10, 2000

8.94.3001 UNIFORM STANDARDS FOR MONUMENTATION

- (1) The following standards govern the monumentation of land surveys:
 - (a) The terms "monument" and "permanent monument" as used in these regulations mean any structure of masonry, metal or other permanent, durable material placed in the ground, which is exclusively identifiable as a monument to a survey point, expressly placed for surveying reference.
 - (b) All metal monuments must be at least one-half inch in diameter and 18 inches in length with a cap not less than 1 inch in diameter marked in a permanent manner with the license number of the surveyor in charge of the survey and either the name of the surveyor or the company employing the surveyor. Metal monuments marking a public land survey corner as described in 70-22-101, MCA, must be at least 24 inches long and 5/8 inch in diameter with an appropriately stamped metal cap at least 2 inches in diameter. A monument marking a public land survey corner may also consist of a cap as described in this rule set firmly in concrete.
 - (c) Before a subdivision plat or certificate of survey may be filed for record the surveyor shall confirm the location of as many monuments as, in the surveyor's professional judgment, are necessary to reasonably assure the perpetuation of any corner or boundary established by the survey and to enable other surveyors to reestablish those corners and boundaries and retrace the survey. The surveyor shall clearly identify on the face of the plat or certificate of survey all monuments pertinent to the survey, and the descriptions of these monuments must be sufficient to identify the monuments.
 - (d) The surveyor shall set all monuments prior to the filing of a plat or certificate of survey except those monuments that will be disturbed by the installation of improvements or that, because of severe weather conditions, may, in the surveyor's judgment, be more appropriately and accurately set after the weather has improved. In these two circumstances the surveyor may set monuments after the survey document is filed if the surveyor certifies on the survey document that the monuments will be set by a specified date. The surveyor shall set monuments, the placement of which has been deferred because of severe weather conditions, within 240 days of the date on which the survey document was filed.
 - (i) If during the later monumentation of the corners of a plat or certificate of survey that were not monumented before the plat or certificate was filed, the surveyor finds that it is necessary to set a reference monument to a corner, the surveyor shall prepare and file an amended certificate of survey or subdivision plat.
 - (ii) The failure of the surveyor to set the monuments by the date certified on the record of survey will be deemed a violation of these rules.

- (e) The surveyor shall set monuments at the following locations:
 - (i) At each corner and angle point of all lots, blocks and parcels of land created by the survey.
 - (ii) At every point of intersection of the outer boundary of a subdivision with an existing road right-of-way line of record or a road right-of-way line created by the survey.
 - (iii) At every point of curve, point of tangency, point of reversed curve, point of compounded curve and point of intersection on each road right-of-way line created by the survey.
 - (iv) At the intersection of a boundary line and a meander line. Meander line angle points need not otherwise be monumented.
- (f) If the placement of a required monument at its proper location is physically impractical, the surveyor may set a reference or witness monument. This monument has the same status as other monuments of record if its location is properly shown. If the surveyor relies upon any existing monument in conducting a survey, he or she shall confirm the location of the monument and show and describe it on the resulting certificate of survey or subdivision plat.

8.94.3002 UNIFORM STANDARDS FOR CERTIFICATES OF SURVEY

- (1) A certificate of survey may not be filed by a county clerk and recorder unless it complies with the following requirements:
 - (a) A certificate of survey must be legibly drawn with permanent ink or printed or reproduced by a process guaranteeing a permanent record and must be 18 inches by 24 inches, or 24 inches by 36 inches, overall to include a 1 ½ inch margin on the binding side.
 - (b) One signed copy on cloth-backed material or on 3 mil or heavier matte stable-base polyester film or equivalent and one signed reproducible copy on a stable-base polyester film or equivalent must be submitted.
 - (c) If more than one sheet must be used to adequately depict the land surveyed, each sheet must show the number of that sheet and the total number of sheets included. All certifications must be placed or referred to on one sheet.
 - (d) A certificate of survey must show or contain on its face or on separate sheets referred to on its face the following information. The surveyor may, at his or her discretion, provide additional information regarding the survey.
 - (i) A title or title block including the quarter-section, section, township, range, principal meridian and county, and, if applicable, city or town in which the surveyed land is located. Except as provided in (1)(f)(v), a certificate of survey

must not bear the title "plat," "subdivision" or any title other than "Certificate of Survey."

- (ii) The name(s) of the person(s) who commissioned the survey and the names of any adjoining platted subdivisions and the numbers of any adjoining certificates of survey previously filed.
- (iii) The date the survey was completed and a brief explanation of why the certificate of survey was prepared, such as to create a new parcel, retrace a section line or retrace an existing parcel of land.
- (iv) A north arrow.
- (v) A scale bar. (The scale must be sufficient to legibly represent the required information and data.)
- (vi) The location of, and other information relating to all monuments found, set, reset, replaced or removed as required by ARM 8.94.3001(1)(c).
 - (A) If additional monuments are to be set after the certificate of survey is filed, these monuments must be shown by a distinct symbol, and the certificate of survey must bear a certification by the surveyor as to which they will be set.
 - (B) All monuments found during a retracement that influenced the position of any corner or boundary indicated on the certificate of survey must be clearly shown as required by ARM 8.94.3001(1)(c).
- (vii) The location of any section corners or corners of divisions of sections the surveyor deems to be pertinent to the survey.
- (viii) Witness and reference monuments and basis of bearings. For purposes of this rule the term "basis of bearings" means the surveyor's statement as to the origin of the bearings shown in the certificate of survey. The basis of bearings may refer to a particular line between monumented points in a previously filed survey document. If the certificate of survey shows true bearings, the basis of bearings must describe the method by which these true bearings were determined.
- (ix) The bearings, distances and curve data of all boundary lines. If the parcel surveyed is bounded by an irregular shoreline or a body of water, the bearings and distances of a meander traverse generally paralleling the riparian boundary must be given.
 - (A) The courses along a meander line are shown solely to provide a basis for calculating the acreage of a parcel that has one or more riparian boundaries as the parcel existed at the time of survey.
 - (B) For purposes of this rule a line that indicates a fixed boundary of a parcel is not a "meander" or "meander line" and may not be designated as one.
- (x) Data on all curves sufficient to enable the re-establishment of the curves on the ground. For circular curves these data must at least include radius and arc

length. For non-tangent curves, which must be so labeled, the certificate of survey must include the bearings of radial lines or chord length and bearing.

- (xi) Lengths of all lines shown to at least tenths of a foot, and all angles and bearings shown to at least the nearest minute. Distance measurements must be stated in English units, but their metric equivalents, shown to the nearest hundredth of a meter, may be noted parenthetically.
- (xii) A narrative legal description of the parcel surveyed as follows:
 - (A) If the parcel surveyed is either an aliquot part of a U.S. government section or a U.S. government lot, the information required by this subsection is the aliquot or government lot description of the parcel.
 - (B) If the survey depicts the retracement or division of a parcel or lot that is shown on a filed certificate of survey or subdivision plat, the information required by this subsection is the number or name of the certificate of survey or plat and the parcel or lot number of the parcel surveyed.
 - (C) If the parcel surveyed does not fall within (1)(d)(xii)(A) or (B), above, the information required by this subsection is the metes-and-bounds description of the perimeter boundary of the parcel surveyed.
 - (D) If the certificate of survey establishes the boundary of a parcel containing one or more interior parcels, the information required by this subsection is the legal description of the encompassing parcel.
 - (E) The requirement of this rule does not apply to certificates of survey that depict a partial retracement of the boundaries of an existing parcel or establish the location of lines or corners that control the location of an existing parcel.
- (xiii) Except as provided by (1)(f)(iv), all parcels created by the survey, designated by number or letter, and the dimensions and area of each parcel. (Excepted parcels must be marked "Not included in this survey.") If a parcel created by the survey is identifiable as a 1/32 or larger aliquot part of a U.S. government section or as a U.S. government lot, it may be designated by number or letter or by its aliquot part or government lot identification.
- (xiv) The location of any easement that will be created by reference to the certificate of survey.
- (xv) The dated signature and the seal of the surveyor responsible for the survey. The affixing of this seal constitutes a certification by the surveyor that the certificate of survey has been prepared in conformance with the Montana Subdivision and Platting Act (76-3-101 through 76-3- 625, MCA) and the regulations adopted under that Act.
- (xvi) A memorandum of any oaths administered under 76-3-405, MCA.
- (xvii) Space for the county clerk and recorder's filing information.

- (e) Certificates of survey that do not represent a division of land, such as those depicting the retracement of an existing parcel and those prepared for informational purposes, must bear a statement as to their purpose and must meet applicable requirements of this rule for form and content.
- (f) Procedures for divisions of land exempted from public review as subdivisions. Certificates of survey for divisions of land meeting the criteria set out in 76-3-207, MCA, must meet the following requirements:
 - (i) A certificate of survey of a division of land that would otherwise be a subdivision but that is exempted from subdivision review under 76-3-207, MCA, may not be filed by the county clerk and recorder unless it bears the acknowledged certificate of the property owner stating that the division of land is exempt from review as a subdivision and citing the applicable exemption.
 - (ii) If the exemption relied upon requires that the property owner enter into a covenant running with the land, the certificate of survey may not be filed unless it bears a signed and acknowledged recitation of the covenant.
 - (iii) If a certificate of survey invokes the exemption for gifts and sales to members of the landowner's immediate family, the certificate must indicate the name of the proposed grantee, the relationship of the grantee to the landowner and the parcel to be conveyed to the grantee.
 - (iv) If a certificate of survey invokes the exemption for the relocation of common boundary lines:
 - (A) The certificate of survey must bear the signatures of all landowners whose parcels will be altered by the proposed relocation. The certificate of survey must show that the exemption was used only to change the location of or eliminate a boundary line dividing two or more parcels, and must clearly distinguish the prior boundary location (shown, for example, by a dashed or broken line or a notation) from the new boundary (shown, for example, by a solid line or notation);
 - (B) The certificate of survey must show the boundaries of the area that is being removed from one parcel and joined with another parcel. The certificate of survey may, but is not required to, establish the exterior boundaries of the resulting parcels. However, the certificate of survey must show portions of the existing unchanged boundaries sufficient to clearly identify both the location and the extent of the boundary relocation;
 - (C) If a boundary line will be completely eliminated, the certificate must establish the boundary of the resulting parcel.
 - (v) A survey document that modifies lots in a platted and filed subdivision and invokes an exemption from subdivision review under 76-3-201 or 76-3-207(1)(d) or (e), MCA, must be entitled "amended plat of the (name of subdivision)," but for all other purposes is to be regarded as a certificate of survey. The document must contain a statement signed by the property owner that approval of the local government body is not required and citing the applicable exemption.

- (vi) If the certificate of survey invokes an exemption from subdivision review under 76-3-207, MCA, the certificate of survey must bear, or be accompanied by, a certification by the county treasurer that all taxes and special assessments assessed and levied on the surveyed land have been paid.
- (vii) For purposes of (1)(f), when the parcel of land for which an exemption from subdivision review is claimed is being conveyed under a contract-for-deed, the terms "property owner", "landowner" and "owner" mean the seller of the parcel under the contract-for-deed.
- (g) Procedures for filing certificates of survey of divisions of land entirely exempted from the requirements of the Act. The divisions of land described in 76-3-201, 76-3-205 and 76-3-209, MCA, and divisions of federally owned land made by a United States government agency are not required to be surveyed, nor must a certificate of survey or subdivision plat showing these divisions be filed with the clerk and recorder. A certificate of survey of one of these divisions may, however, be filed with the clerk and recorder if the certificate of survey meets the requirements for form and content for certificates of survey contained in this rule and bears a certificate of the surveyor performing the survey citing the applicable exemption from the Act or, when applicable, that the land surveyed is owned by the federal government.

8.94.3003 UNIFORM STANDARDS FOR FINAL SUBDIVISION PLATS

- (1) A final subdivision plat may not be approved by the governing body or filed by the county clerk and recorder unless it complies with the following requirements:
 - (a) Final subdivision plats must be legibly drawn with permanent ink or printed or reproduced by a process guaranteeing a permanent record and must be 18 inches by 24 inches or 24 inches by 36 inches overall to include a 1 1/2-inch margin on the binding side.
 - (b) One signed copy on cloth-backed material or on 3 mil or heavier matte stable-base polyester film or equivalent and one signed reproducible copy on a stable-base polyester film or equivalent must be submitted.
 - (c) If more than one sheet must be used to adequately depict the land subdivided, each sheet must show the number of that sheet and the total number of sheets included. All certifications must be placed or referred to on one sheet.
 - (d) A survey that modifies a filed subdivision plat must be entitled "amended plat of (lot, block and name of subdivision being amended)," and unless it is exempt from subdivision review by 76- 3-201 or 76-3-207(1)(d) or (e), MCA, may not be filed with the county clerk and recorder unless it meets the filing requirements for final subdivision plats specified in this rule.
- (2) A final plat submitted for approval must show or contain, on its face or on separate sheets referred to on the plat, the following information. The surveyor may, at his or her discretion, provide additional information regarding the survey.

- (a) A title or title block indicating the quarter-section, section, township, range, principal meridian, county and, if applicable city or town, in which the subdivision is located. The title of the plat must contain the words "plat" and either "subdivision" or "addition".
- (b) The name of the person(s) who commissioned the survey and the name(s) of the owner of the land to be subdivided if other than the person(s) commissioning the survey, the names of any adjoining platted subdivisions, and the numbers of any adjoining certificates of survey previously filed.
- (c) A north arrow.
- (d) A scale bar. (The scale must be sufficient to legibly represent the required information and data on the plat.)
- (e) The location of, and other information relating to all monuments found, set, reset, replaced or removed as required by ARM 8.94.3001(1)(c).
 - (i) If additional monuments are to be set after the plat is filed, the location of these monuments must be shown by a distinct symbol, and the plat must bear a certification by the surveyor as to the reason the monuments have not been set and the date by which they will be set.
 - (ii) All monuments found during a retracement that influenced the position of any corner or boundary indicated on the plat must be clearly shown as required by ARM 8.94.3001(1)(c).
- (f) The location of any section corners or corners of divisions of sections pertinent to the survey.
- (g) Witness and reference monuments and basis of bearings. For purposes of this rule the term "basis of bearings" means the surveyor's statement as to the origin of the bearings shown on the plat. The basis of bearings may refer to a particular line between monumented points in a previously filed survey document. If the plat shows true bearings, the basis of bearings must describe the method by which these true bearings were determined.
- (h) The bearings, distances and curve data of all boundary lines. If the subdivision is bounded by an irregular shoreline or body of water that is a riparian boundary, the bearings and distances of a meander traverse generally paralleling the riparian boundary must be given.
 - (i) The courses along a meander line are shown solely to provide a basis for calculating the acreage of a parcel with one or more riparian boundaries as the parcel existed at the time of survey.
 - (ii) For purposes of these regulations a line that indicates a fixed boundary of a parcel is not a "meander" or "meander line" and may not be designated as one.
- (i) Data on all curves sufficient to enable the re-establishment of the curves on the ground. For circular curves these data must at least include radius and arc length. For non-

tangent curves, which must be so labeled, the plat must include the bearings of radial lines or chord length and bearing.

- (j) Lengths of all lines shown to at least tenths of a foot, and all angles and bearings shown to at least the nearest minute. Distance measurements must be stated in English units, but their metric equivalents, shown to the nearest hundredth of a meter, may be noted parenthetically.
- (k) The location of any section corners or corners of divisions of sections the surveyor deems to be pertinent to the subdivision.
- (l) All lots and blocks in the subdivision, designated by number, the dimensions of each lot and block, the area of each lot, and the total acreage of all lots. (Excepted parcels must be marked "Not included in this subdivision" or "Not included in this plat," as appropriate, and the bearings and lengths of these excepted boundaries must be shown.)
- (m) All streets, alleys, avenues, roads and highways; their widths (if ascertainable) from public records, bearings and area; the width and purpose of all road rights-of-way and all other easements that will be created by the filing of the plat; and the names of all streets, roads and highways.
- (n) The location, dimensions and areas of all parks, common areas and other grounds dedicated for public use.
- (o) The total acreage of the subdivision.
- (p) A narrative legal description of the subdivision as follows:
 - (i) If the parcel being subdivided is either an aliquot part of a U.S. government section or a U.S. government lot, the information required by this subsection is the aliquot or government lot description of the parcel.
 - (ii) If the plat depicts the division of a parcel or lot that is shown on a filed certificate of survey or subdivision plat, the information required by this subsection is the number or name of the certificate of survey or plat and the number of the parcel or lot affected by the survey.
 - (iii) If the parcel surveyed does not fall within (2)(p)(i) or (ii), above, the information required by this subsection is the metes-and-bounds description of the perimeter boundary of the subdivision.
 - (iv) If the plat establishes the boundaries of a subdivision containing one or more interior parcels, the information required by this subsection is the legal description of the perimeter boundary of the subdivision.
- (q) The dated signature and the seal of the surveyor responsible for the survey. The affixing of this seal constitutes a certification by the surveyor that the final plat has been prepared in conformance with the Montana Subdivision and Platting Act (76-3-101 through 76-3-625, MCA) and the regulations adopted under that Act.

- (r) A memorandum of any oaths administered under 76-3-405, MCA.
 - (s) The dated, signed and acknowledged consent to the subdivision of the owner of the land being subdivided. For purposes of this rule when the parcel of land proposed for subdivision is being conveyed under a contract-for-deed, the terms "owner" and "owner of the land" refers to the seller under the contract-for-deed.
 - (t) Certification by the governing body that the final subdivision plat is approved.
 - (u) Space for the clerk and recorder's filing information.
- (3) The following documents must appear on the face of or accompany the approved final plat when it is presented to the county clerk and recorder for filing:
- (a) If applicable, the owner's certificate of dedication of streets, parks, playground easements or other public improvements.
 - (b) If applicable, a certificate of the governing body expressly accepting any dedicated land, easements or improvements. An acceptance of a dedication is ineffective without this certification.
 - (c) A certificate of a title abstractor showing the names of the owners of record of the land to be subdivided and the names of any lien holders or claimants of record against the land and the written consent to the subdivision by the owners of the land, if other than the subdivider, and any lien holders or claimants of record against the land.
 - (d) Copies of any covenants or deed restrictions relating to the subdivision.
 - (e) If applicable, a certificate from the state department of environmental quality stating that it has approved the plans and specifications for water supply and sanitary facilities.
 - (f) A certificate from the subdivider indicating which required public improvements have been installed and a copy of any subdivision improvements agreement securing the future construction of any additional public improvement to be installed.
 - (g) Unless otherwise provided by local subdivision regulations, copies of final plans, profiles, grades and specifications for improvements, including a complete grading and drainage plan, with the certification of a registered professional engineer that all required improvements which have been installed are in conformance with the attached plans. Local subdivision regulations may authorize the subdivider, under conditions satisfactory to the governing body, to prepare these plans and specifications after the final plat has been filed or file them with a government official other than the county clerk and recorder, or both.
 - (h) If applicable, the certificate of the examining land surveyor.
 - (i) If a street created by the plat will intersect with a state highway, a copy of the state highway access or encroachment permit.
 - (j) The certification of the county treasurer that all real property taxes and special assessments assessed and levied on the land to be subdivided have been paid.
